

Entrée Wireless

Mobility Solutions for Demanding Applications

Warrior Product Overview

Entrée Wireless is a leading provider of wireless mobility solutions for demanding applications. The Entrée product line is designed to enhance communications for public safety, first responder and mobile personnel. The products are rugged, self contained, battery/solar powered equipment packages featuring a flexible, modular, man portable design for applications that require the rapid deployment of communication equipment to emergency, temporary and hard to wire locations.

Original 'HotSpot in a Box' - Wi-Fi, 4.9Ghz, 3G, WiMax, Satellite – Mesh Networks

The Original Warrior Portable 'HotSpot' in a box family has grown to include 3G, 4.9Ghz, Wi-Fi, Satellite Hotspots, as well as mesh networks and portable WiMax systems. Currently the Warrior family supports CDMA, GSM, 4.9Ghz, BGAN Satellite and WiMax networks via equipment such as the Linksys G3G, Kyocera KR1, Junxion JB-1100b/e, Top Global MB8000, Airlink PinPoint-Raven, Airaya 4.9Ghz, and the Proxim 4900 and Firetide- Hotport 6000 mesh routers, NERA, and Airspan.

Warrior Product Platforms for Portable Emergency Communication System

These product platforms are designed to support the development of custom emergency communication systems. Call us to help you pick the platform that matches your requirements.

Model WPP-	Application	Equipment
B10	HotSpot	3G, Wi-Fi, 4.9Ghz
C12	Dual Access	Satellite, Mesh networks
E35	Patient Tracking	Laptop, handhelds, 3G/Wi-Fi
H40	Incident Command	Laptop, 3G, Satellite, VOIP, FAX

Warrior Patient & Equipment Tracking System

The Model WPH-FTK is a turnkey, ruggedized, self-contained, battery powered, man-portable patient tracking system with a 3G/Wi-Fi HotSpot for Internet access, a quad battery charger for the handhelds and a battery/charger system that will power all equipment for up to 8 hours on battery and indefinitely on AC or vehicle power

Warrior Portable Incident Command Kit

The Model WPH-PCK is a ruggedized, man portable, self contained battery, charger, equipment package designed for robust and reliable communication in NIMS style Incident Command applications. A typical configuration is a laptop, a portable printer, a BGAN, a 3G/Wi-Fi router and WIP phones (2). The package includes a high capacity battery and fast AC charger and supports equipment up to 40W total.

Portable Wireless IP Video Cameras

The WBV-4GC Warrior Battery Pack is a compact, light weight case and battery pack for the Linksys WVC54GC wireless IP video camera. The WBV-4GC operates on AC or up to 10 hours.

Solar Charger Options

Most of the Warrior products can be configured to include a solar power option. This option is designed to work with 12V solar panels up to 80W. Ideal for long term operation in remote locations.

Rapid Design Services – Custom Solutions

Entrée offers rapid design services for the integration and packaging of sensing, monitoring and communication equipment. For most applications, a custom solution including small volume production can be designed and delivered in 2 to 4 weeks.
